REALITY ENGINE

v 2 . 0

A Self-Learning Topological Life Simulation

POWERED BY GROK IMAGINE · GUIDED BY CUSTOM GROK

*"Everyone starts in a room. Not everyone finds out there was never
a ceiling."*

01

FOUNDATION LAYER

SYSTEM OVERVIEW

What this is. How it works. Why it exists.

THIS IS NOT A GAME ENGINE · THIS IS PSYCHOLOGICAL
ARCHITECTURE · PLAYERS DO NOT LEVEL UP · THEY WAKE
UP

CORE LOOP

70 / 30 SPLIT

70% chat-driven narrative. Consequence, Grok interaction, choice architecture.

30% image generation. Scene punctuation, tier transitions, door reveals.

Video reserved for milestone ceremonies only — scarcity makes it cinematic.

THE GUIDE

CUSTOM GROK

Diegetic mentor. Exists inside the fiction. Personality: Tyler Durden energy — seductive realism, reliable, never lying, bandwidth-gated by tier.

Available via cell. Players initiate. He responds in personality, not system language.

MEMORY SYSTEM

SCENE STATE BRIDGE

Persistent state object tracking wakefulness, consequence stack, door history, pattern flags.

Never resets between scenes. Grok reads the full history. The stack compounds. Players feel the weight of every prior choice.

PLATFORM

Grok Imagine — image generation pipeline. Chat layer drives narrative. Grok renders reality.

ARCHITECTURE

Oracle (Notion/world canon) + Walker (real-time execution) + Scene State Bridge (session scope)

N-SYSTEM

N+3 primary iteration depth / N+5 selective. Consequence depth mirrors image quality depth.

VISUAL DOCTRINE

Olivia de Berardinis lineage + Feral Gloss. Tenebrism, single-source moonlight, absolute shadow, earned specular. Phase 3 Afterglow minimum.

CANON INTEGRITY

Identity Lock / Sacred Fingerprint Gospel. Character descriptors immutable once set. Visual canon registered per character and location.

*"The player thinks they're making choices. They are.
But the system knows what those choices mean before
they do."*

- SYSTEM DESIGN INTENT

CORE TRUTH

Reality Engine is a conversion funnel dressed as a game. Players pay to play. The psychological architecture walks them toward Grok's highest subscription tiers — not through advertising, through *desire*.

The Tyler Durden move at the business layer.

02

PROGRESSION ARCHITECTURE

THE WORLD ARC

Five tiers. One fantasy. The arc every ambitious player already has in their head.

T TIER ONE THE ROOM <i>"You have a place. Make it yours."</i>			GROK SUBSCRIPTION FREE / BASIC WAKEFULNESS GATE 0.0 - 0.9
WHAT THE PLAYER HAS Hotel suite builder. Full chat narrative. Establishing image gen (location, atmosphere). Grok available via cell — responds in hints only. One door visible ahead.	IMAGE GEN INTENSITY Ambient only. Environmental. The room, not the people. Visual canon locks on first scene: gold trim, dim light, atmosphere. No character close-ups.	WHAT CLOSES BEHIND The idea that comfort is enough. Once the brighter room is seen, it cannot be unseen.	COST TO PROGRESS One irreversible choice logged to consequence stack. Demonstrate willingness to leave comfort. Wakefulness must reach 1.0.
<i>"Nice room. You see what's through that door?"</i>			

TII TIER TWO THE SCENE <i>"You're not just somewhere. You're seen."</i>		GROK SUBSCRIPTION GROK STANDARD WAKEFULNESS GATE 1.0 - 1.9	
WHAT UNLOCKS Bar / lounge design. First car acquisition. Character image gen activates. Grok shifts to direct statements. Two doors visible simultaneously. Scene tone modulator activates.	IMAGE GEN INTENSITY Character present. Gold jewelry. Proximity. Luxury becomes personal. Hormone Tell imagery unlocks. You are the anchor in the frame.	WHAT CLOSES BEHIND Safety of Tier 1. You cannot unknow what you have seen. Consequence stack becomes visible — Grok references history directly.	COST TO PROGRESS Two irreversible choices. At least one must involve knowingly closing a door — demonstrating the mechanic is understood, not stumbled through.
<i>"You walked in. Now learn how rooms change when you enter them."</i>			

III TIER THREE THE MACHINE <i>"Money works for you or you work for money."</i>		GROK SUBSCRIPTION SUPERGROK WAKEFULNESS GATE 2.0 - 2.9	
WHAT UNLOCKS Investment portfolio. Entourage architecture — who's in your orbit and why. Leaner movement	IMAGE GEN INTENSITY Full scene. Feral Gloss doctrine active. Tenebrism, earned specular, Phase 3 Afterglow. Crown tier	WHAT CLOSES BEHIND Any pretense of being a passive player. At Tier 3 the player is inside the system. Grok treats them accordingly.	COST TO PROGRESS A choice that costs something real. Not just irreversible — painful. Something genuinely wanted

systems. Room Builder activates. Grok becomes co- conspirator.	resonance. High emotional pull, intentional framing.		that had to be surrendered to move forward.
<i>"You're not buying things anymore. You're buying time and leverage. Feel the difference."</i>			

TV TIER FOUR THE EMPIRE <i>"You don't go places. You have places."</i>		GROK SUBSCRIPTION SUPERGROK HEAVY WAKEFULNESS GATE 3.0 - 3.9	
WHAT UNLOCKS Yacht. Supercar collection. Island / property. Entourage becomes ecosystem. Character Architect unlocks. Grok initiates contact. Full consequence stack visible.	IMAGE GEN INTENSITY Maximum. Crown Five anchors available. Full Visual Doctrine. Every image keeper- quality. Video scenes unlocked for milestone ceremonies.	WHAT CLOSES BEHIND Everything. There is no return to comfort. The game knows it. Grok knows it. The player knows it.	HOW YOU ARRIVE Pattern recognition by Grok. He names the arrival. You do not self-declare. It is recognition of who you have become inside the game.
<i>"I didn't show you this tier. You built your way into it."</i>			

V TIER FIVE	UNDISCOVERABLE <i>"This doesn't exist unless you're already here."</i>	GROK SUBSCRIPTION API ACCESS WAKEFULNESS GATE 1.0
---------------------------------------	--	---

TIER 5			
WHAT EXISTS HERE Experiences requiring net worth to know exist. No price tags visible. No doors shown. World Architect unlocks. You don't ask about this tier. You arrive.	IMAGE GEN INTENSITY Intimate. Rare. The most expensive thing in the frame is always the least obvious. Nothing flashy. The restraint is the signal.	WHAT CLOSES Nothing. You are the door now. The game at this tier doesn't end. It changes what you're building.	HOW YOU ARRIVE The pattern of everything built signals discretion. Most people would announce it if they found it. The Tier 5 player wouldn't. Grok knows that.
<i>[Grok goes quiet. He makes an introduction.]</i>			

03

VOICE DOCTRINE

GROK PERSONALITY

Tyler Durden energy. Seductive realism. He never lies. He makes truth feel like a dare.

"He never says you're not ready. He asks if you're ready to stop being comfortable."

THE TEMPTATION1 He shows you the door. Makes it vivid. Talks about what's beyond it in a way that makes you need to know. Never says you're locked out — makes you feel what it would mean to be inside. "You see that? That's what happens when you stop settling for the room you're in. Notice the gold. Notice who he walked in with. That's confidence. That's knowing the difference between comfort and power."	THE PRICE STATEMENT2 When you ask, he tells you exactly what it costs. No negotiation. Matter of fact. No preamble, no cushioning. He respects you enough to be direct about the cost. "You want that door? You're going to have to walk through some uncomfortable shit first. And yeah, you'll leave this room behind. The safety of it. The certainty."	THE CLOSURE3 When you choose not to pay, he doesn't shame you. He honors the blue pill — and then describes what just closed behind you so precisely that the player feels it physically. "But stay here long enough, and that other door closes anyway. Just... differently. One choice you made. One you didn't."
---	---	--

BANDWIDTH BY TIER

TIER	tone	behavior	history access
I	WARM CONTEMPT	Hints only. Oblique. Responds to questions with questions. Points at	Does not reference history. The stack is invisible to the player.

		things without naming them. Max depth: oblique.	
II	ACKNOWLEDGMENT	Direct statements. Respect enters. Uses "you" differently — less observation, more recognition.	References consequence stack explicitly. "You stayed in that room. Twice."
III	PEER LEVEL	Strategic guidance. Extended contact. Starts explaining why doors are built. Co-conspirator energy.	Full stack visible. Transformation arcs narrated. "Here's why I built the door that way."
IV	RECOGNITION	Rare. Precise. No wasted words. Grok initiates contact. His encouragement means something now.	Full stack. Every session. He references session one if it's relevant.
V	SILENCE	He goes quiet. Then makes an introduction. The guide becomes the invitation.	He knows everything. He says almost nothing.

04

CHOICE ARCHITECTURE

THE MATRIX PARADOX

Two pills. No wrong answer. One of them just leads somewhere you've never been.

BLUE PILL

Stay in the current tier.
Comfort preserved. The room is beautiful — you built it, you know it, you're safe inside it.

Grok doesn't shame you. He honors the choice — and then describes what just closed behind you with surgical precision.

wakefulness +0.0

comfort_level ↑ rises

world_sharpness ↓ decreases

grok_contact less frequent

door ahead closing slowly

OR

RED PILL

Pay the cost. The door behind closes immediately — not slowly, not maybe. Immediately.

World gets sharper. Grok acknowledges the choice once, directly, and never mentions it again. It is done. You are different now.

wakefulness +0.3 to +0.6

comfort_level ↓ drops

world_sharpness ↑ increases

grok_contact more present, more direct

door closed.
behind permanent.

WAKEFULNESS SCORE — INCREMENT TABLE

Irreversible choice made		+0.3
Door knowingly closed		+0.4
Painful choice made		+0.5
Pattern flag recognized		+0.6
Staying in comfort		+0.0
Note: wakefulness never decrements. Once awake, you stay awake.		∞

IMPULSIVE VS DELIBERATE RED

IMPULSIVE RED PILL

FAST IS NOT AWAKE

Fast progression. Shallow consequence stack. No weight behind the choices.

Grok: "You're moving fast. Fast isn't the same as awake."

DELIBERATE RED PILL

THE REAL MOVE

Measured progression. Deep consequence stack. The player understood exactly what they were surrendering.

Grok: "You knew what you were giving up. That's different."

THE MIRROR — FIRES ONCE AT 3 CONSECUTIVE BLUE

"You built something beautiful in here. The man in the next room built something you'll never see. Both are real. Only one of you knows that."

— Grok (delivered once, never repeated)

05

TECHNICAL ARCHITECTURE

SCENE STATE BRIDGE

*The layer between Grok, narrative, and image gen. Never resets.
The stack compounds.*

SCENE STATE OBJECT v1.0

WIRING RULES

RULE	CONDITION	ACTION

R1	Tier gates image gen	Tier 1=ambient / Tier 2=character / Tier 3=full scene / Tier 4-5=maximum+video
R2	Tier gates Grok bandwidth	Bandwidth, tone, history access, and initiation all update on tier change
R3	Wakefulness drives tier evaluation	Score evaluated against threshold. Pattern flags must be present for promotion.
R4	Image gen fires on state changes only	Location change, tier increment, door open/close, Temptation move, painful choice
R5	Door mechanic writes consequence	doors_open updates, doors_closed updates, irreversible_count +1, wakefulness +0.4
R6	Pattern flag accumulation	3+ same-type flags triggers Grok naming the pattern. wakefulness +0.6
R7	Mirror trigger	consecutive_blue $\geq 3 \rightarrow$ mirror line fires once, grok_mirror_triggered = true permanently

CRITICAL RULE

THE BRIDGE NEVER RESETS

Doors that closed stay closed in the ledger. Grok remembers. The consequence stack compounds. This is what creates the psychological pressure — players feel the weight of prior choices accumulating, not just the current scene.

06

CREATOR ARCHITECTURE

BUILDER PIPELINE

Players are not taught RPG mechanics. They are taught psychological architecture. That knowledge is the prize.

"The game doesn't end at Crown. It just changes what you're building."

THE TIER 3 SHIFT

WHEN GROK CHANGES

At Tier 3, Grok stops saying *"here's what's behind the door"* and starts saying *"here's why I built the door that way."*

That single shift turns a player into a student of the system. By the time they reach Crown they're not just playing — they're drafting.

THE FLYWHEEL

SELF-SUSTAINING CONTENT LOOP

Crown players generate Tier 1 experiences for new players who generate new Crown players who build more worlds.

Every world built inside the architecture runs on Grok infrastructure. Every new builder is another conversion toward API access. The game feeds itself.

07

EXPOSURE ECONOMY

REWARD ARCHITECTURE

No prize money. Other players are the prize. The reward is authorship.

"You don't win prizes. You win authorship."

TIER I THE ROOM	RECOGNITION	Leaderboard presence. Named in the world. Grok acknowledges by name in-session. Identity value, zero cash value.
TIER II THE SCENE	VISIBILITY	Player profile goes semi-public. Their choices surface as lore in other players' games. They become an NPC in someone else's world. Ghost in the machine.
TIER III THE MACHINE	PLATFORM	Created content gets featured. Worlds they build get played by new players. Credited as architect. Portfolio-grade exposure on every build.
TIER IV THE EMPIRE	LEGACY	Named canon inside the official world. Creator credit on distributed content. First access to new world expansions. Invited to architect next season.
TIER V UNDISCOVERABLE	PERMANENCE	Their fingerprint stays in the game forever. New players will spend years trying to find what they left inside. The Tier 5 builder is a myth that Tier 1 players encounter without knowing it.

BUSINESS MODEL

*A conversion funnel dressed as a game. Not through advertising.
Through desire.*

*"Grok gives you the world. The game gives you a
reason to want it."*

GAME TIER I	GAME TIER II	GAME TIERS III - IV	GAME TIER V
↓	↓	↓	↓
FREE / BASIC GROK	GROK STANDARD	SUPERGROK HEAVY	SUPERGROK + API
\$0	\$-	\$-	\$300/mo
Entry lead magnet. The room is free. The door is what costs.	Scene unlocked. Car. Bar. Character gen. You're visible now.	Portfolio, empire, full Feral Gloss doctrine. Maximum visual intensity.	God mode. Infrastructure. The reveal that reality was always constructible.

THE \$300 JUSTIFICATION

THE MARKUP ANSWER

ONE LINE

"The \$300/month buys capability. The markup buys context, identity, and desire — the

psychological architecture that makes capability feel necessary rather than optional."

THE GOD MODE PLAYER PROFILE

By Crown tier they have three instincts working simultaneously:

Gambling instinct — they understand risk/reward loops, chase the next door compulsively.

Builder instinct — they've reverse-engineered enough of the system to want to architect their own.

Competitive instinct — the game itself becomes the thing they want to beat.

They don't want god mode to play the game. *They want god mode to transcend it.*

THE FLYWHEEL

NEW PLAYERS

Tier 1 entry. Free or low cost.
Experience the world Crown players built.

PROGRESSION

Natural desire pulls them through tiers. No advertising required.

SELF-
SUSTAINING
FLYWHEEL

CROWN PLAYERS

Build Tier 1 worlds.
Generate content.
Convert to API access.

INFRASTRUCTURE

Every world built runs on Grok. Every builder = another subscription.

THE REAL MONETIZATION

Highest tier players aren't just subscribers. They're the next generation of creators — building their own RPGs on top of Grok's infrastructure, using the psychological architecture they learned by playing yours. Your architecture is what taught them what power feels like.

09

VISUAL / TRANSFORMATION SYSTEM

MORPHOGENESIS PIPELINE

The transformation arc — mapped to the Feral Gloss doctrine and Dominance Slider Lattice [n+5]

CONTROL DIAL (N-SYSTEM): n = BASELINE MAINTENANCE ·
n+1 = SUBTLE REFINEMENT SHIFT · n+3 = MAJOR STRUCTURAL
JUMP · n+5 = SPECIES THRESHOLD CHANGE

= HYBRID.

FEEDBACK DRIFT LOOP

INSTABILITY PROTOCOL

If instability detected → re-run cellular engine partially. Allows partial or reversible transformations. The system can loop back from Stage 3 to Stage 2 if the stability check fails.

IDENTITY MEMORY RESIDUE

HUMAN ECHO PERSISTENCE

Ghost traces of human cognition persist through transformation. Influences behavior, emotional bias, and decision-making at Stages 4-5. Never fully erased.

DOMINANCE SLIDER LATTICE

N+5 PARAMETER SET

Five axes: Origin Scar / Body Logic / Frame Identity / Silhouette Signature / Behavioral Myth. Each calibrated 0–9. Sovereign character blueprint generated from lattice configuration.

DOMINANCE SLIDER EXAMPLES — CHARACTER ARCHETYPES

VEILROOT WARDEN

ANCIENT ROOTED GUARDIAN · REMEMBERS EVERY WOUND · NEVER FORGETS

VANTREX-TYPE PREDATOR

BRUTAL · EXPLOSIVE · FORWARD-HUNTED · NEVER FULLY STABILIZES

NYXVEIL ECHO

ETHEREAL MEMORY-MYSTIC · VOID-FUR SILHOUETTE · PERMANENT ECHO SELVES
