

FERAL GLOSS EMPIRE

REGISTRY MASTER ARCHIVE

Complete Instrument Set · v1.0

Compiled 2026-06-18 · Director: Keith Clemente

Contents

#	Instrument	ID	Type	Status
01	Relic Lock Protocol & Assembly Ruleset	FGE-CONST-LOCK-001 v1.1	Constitution	<i>Ratified-direction</i>
02	Commercial Doctrine & Foundation Set	FGE-CONST-COMM-001 v1.0	Constitution	<i>Minted draft</i>
03	Foundation Set Production Order	FGE-PROD-DECK-001	Grok payload	<i>Active, ART-01/02 dispositioned</i>
04	Product Engine Specification	FGE-ENGINE-PROD-001 v1.0	Engine spec	<i>Tuned, input-gated</i>
05	Character Expansion Template	FGE-TMPL-CHAR-001 v1.0	Template + 30 candidates	<i>Active intake</i>
06	Master Disposition Sheet	FGE-PROD-DISP-001 v1.0	Audit / 43 assets	<i>Complete</i>
07	Opening Doctrine — rebuilt master	FGE-DOC-001 v1.0	Primary infographic	<i>Rebuilt, text-perfect</i>

This PDF is a **read-only archive** of all instruments in sequence. Editable source files (.docx, .xlsx, .md, .html) are delivered separately in the registry ZIP — each instrument versions independently. Normalized reference images (43) and the rebuilt Opening Doctrine master are in the ZIP under their own folders.

Other substrates propose; the Director disposes.

FERAL GLOSS EMPIRE

RELIC LOCK PROTOCOL & ASSEMBLY
RULESET

Constitution of Transformation — v1.1 (Amended)

Instrument ID: FGE-CONST-LOCK-001

Status: AMENDED DRAFT — READY FOR DIRECTOR RATIFICATION

Date: 2026-06-10 · Author of Record: Keith Clemente, Director · Drafting Substrate: Claude · Cross-Model Validation: Complete

Amendment Log — v1.0 → v1.1

All amendments clarify the architecture; none alter the foundation. Per Director instruction, amendments are incorporated prior to ratification.

Ref	Amendment
A-1	Minting Law added: no Narrative Card exists without a populated Lock Manifest. Manifest precedes production, always.
A-2	Domain set compressed from ten to five: Material, Light, Form, Environment, Narrative. Former domains become sub-expressions. Resolution Ladder compressed accordingly.
A-3	Card Weight system added (Dominant / Supporting / Accent) as compiler render guidance, with a one-Dominant-per-Assembly cap.
A-4	Instrument III added: Card Lifecycle & Canon Gravity (Candidate → Minted; Active / Archive; Major / Secondary / Experimental).
A-5	Instrument IV added: Canonical Render Pipeline — tool-agnostic minting doctrine. Cards are minted from finalized assets, never drafts.
A-6	Part V added: Foundation Set Doctrine — Minimum Viable Deck of 30 fully governed cards; remaining origin assets held as Expansion Pool candidates.

Preamble & Authority

This instrument governs every act of transformation within the Dual-Species Card Architecture (FGE-PROP-SYSTEM-001). It binds four instruments and one doctrine: **I — the Relic Lock Protocol** (what may never be transformed), **II — the Assembly Ruleset** (how legal transformation occurs), **III — Card Lifecycle & Canon Gravity** (how attention and status are allocated at scale), **IV — the Canonical Render Pipeline** (how assets become cards), and **V — the Foundation Set Doctrine** (the minimum viable ecosystem).

This instrument establishes **two kernels of protection**: the Data Kernel (sbid, lineage, core conflict, frequency cluster — protected metadata) and the **Visual Kernel** (protected appearance — eyes, facial geometry, signature markings, signature materials, relic signatures). A field can remain unchanged while the audience perceives a different character; the audience adjudicates identity. Visual continuity is the actual asset.

Terminology is original to FGE. The ruleset is comparable in rigor to established collectible-game systems but cites none and borrows no proprietary mechanics.

Instrument I — Relic Lock Protocol

1.1 Purpose

The Lock Protocol is the safety system that runs **before** any Assembly. It guarantees that no Artifact Card — alone or stacked — can alter a protected element of a Narrative Card. The Data Kernel protects metadata; the Lock Protocol protects the Visual Kernel — the **image of canon** itself.

1.2 Lock Classes

Class	Name	Rule	Example
Ω	Omega Lock	Absolute immunity. No Artifact in any domain, at any stack depth, may alter this element. Violation = automatic Assembly rejection, logged as a lock event.	Isolde’s uniform green eyes (OMEGA relic)
A	Signature Lock	Protected within named domains only. Artifacts whose domain footprint intersects the locked domains are illegal against this card. Other domains may recontextualize the element.	Isolde’s black hair + center part: locked vs. Material & Light; Environment may recontextualize
B	Drift Watch	Transformable, but every output touching this element is auto-flagged to the canon line for drift review before release. Production line never adjudicates.	Feral Gloss skin / photonic bloom intensity
—	Open	Free transformation within Assembly limits. No flag, no review beyond the standard quality gate.	Background, atmosphere, supporting wardrobe

1.3 The Lock Manifest & the Minting Law

Minting Law (A-1): no Narrative Card may be minted, produced, or replicated without a populated Lock Manifest. The manifest precedes production. A character without a manifest is

a temporary sketch; a character with a manifest is a protected asset. The anchor must exist before replication begins — locks added after popularity invite disputes about what the original ever was.

Required Manifest Fields

- **element_id** — stable identifier for the protected element
- **element_description** — human-readable definition, quoted from the locked dossier
- **lock_class** — Ω / A / B / Open
- **locked_domains** — for Class A only: the domains barred from acting on this element
- **source_dossier** — dossier ID and version the lock derives from
- **lock_decree** — Director decree reference that established or amended the lock

Manifests are append-only. Locks may be added or escalated ($\text{Open} \rightarrow \text{B} \rightarrow \text{A} \rightarrow \Omega$) by Director decree at any time. De-escalation or removal requires a formal decree with stated rationale, recorded in lineage. Locks never silently disappear.

1.4 The Eligibility Gate (Pre-Assembly Check)

Runs before any generation resource is spent. A pure schema check, image-agnostic, consistent with Master Anchor doctrine: validation never requires image production.

1. **Load** the Lock Manifest of every Narrative Card in the Assembly.
2. **Resolve** the domain footprint and Card Weight of every Artifact Card in the Assembly.
3. **Omega check:** if any Artifact's declared effect could plausibly intersect an Ω element, the Assembly is **rejected outright**. No override path exists below Director decree amending the lock itself.
4. **Signature check:** if an Artifact's domain appears in any Class A locked_domains list, the Assembly is rejected; substitute a legal Artifact and resubmit.
5. **Weight check:** more than one Dominant-weight Artifact = rejection (§2.4).
6. **Drift tag:** if Class B elements are in scope, the Assembly proceeds but the output is born pre-flagged for canon-line review.
7. **Certificate:** a passing Assembly receives an Eligibility Certificate recorded in lineage. No certificate, no generation.

1.5 Lock Authority

- Only the canon line, by Director decree, creates, escalates, or amends locks.
- The production line and the compiler **read** manifests; they never write them.
- A rejected Assembly is never an authority to question a lock — it is an escalation event, identical in handling to the body-signature drift event already on record.

Instrument II — Assembly Ruleset

2.1 Species Law

- **Narrative Cards are subjects.** They are the only legal targets of transformation.
- **Artifact Cards are operators.** They act on subjects; they never act on each other. No Artifact may target, modify, copy, or negate another Artifact.
- Governance instruments, decrees, and doctrine documents are **not cards** and can never enter an Assembly.

2.2 The Five Domains (A-2)

Every Artifact Card is assigned exactly one domain. Former domains persist as **sub-expressions** — vocabulary within a domain, not governance objects. Five strong domains are easier to govern than ten weak ones; every additional domain is governance, documentation, QA, and future game burden.

Domain	Governs	Absorbed Sub-Expressions
Material	Surfaces, substances, material signatures (Obsidian, Kintsugi, Pearl, Fracture)	—
Light	Illumination, tenebrism, photonic behavior, iridescence	—
Form	Shape, structure, and adornment of subject and scene	Fashion, Architecture, Scale
Environment	Setting, terrain, world context, air and weather	Atmosphere
Narrative	Story framing, event context, emblematic overlays	Symbolism

Motion is reclassified (A-2): motion is a property of the output class (Motion Loop, trailer frame), not a transformation domain. Motion parameters are declared at output binding, outside the Artifact system. New domains, or promotion of a sub-expression to domain, require formal decree.

2.3 Assembly Limits

Limit	Rule
Stack cap	Maximum three (3) Artifact Cards per Assembly. Endorsed by two independent validators.
Domain exclusivity	One Artifact per domain per Assembly. Two Material Artifacts can never co-occur.
Weight cap	Maximum one Dominant-weight Artifact per Assembly (§2.4).

Limit	Rule
Subject count	One primary Narrative subject per Assembly in v1.x. Multi-subject Assemblies deferred pending Calista's dossier and the constellation panel.
Output binding	Every Assembly declares its output class before the Eligibility Gate (Hero Poster, Lookbook shot, Card Set frame, Motion Loop). Motion parameters exist only in motion output classes.

2.4 Card Weight (A-3)

Operators are not equivalent. Some transformations accent an image; some dominate it. Weight is **render guidance to the compiler**, not a game mechanic: it tells the compiler how much of the visual budget an Artifact commands, and prevents combinations that are legal on paper but visually annihilate one another.

Weight	Name	Meaning
3	Dominant	Commands the image. Defines the read of the output. Maximum one per Assembly. Example: a total-ascension or full-fracture operator.
2	Supporting	Substantial, visible transformation that coexists with a Dominant. Example: a wardrobe system, an environmental shift.
1	Accent	Detail-level effect. Seasons the image without restructuring it. Example: an emblem overlay, a particulate pass.

Weight is assigned at Artifact minting, recorded in the Artifact's schema, and amendable only by decree.

2.5 The Resolution Ladder (Compressed)

Artifacts that pass the Eligibility Gate apply in a **fixed, universal order** — never the order drawn, named, or prompted. Same cards, same compile, every time. Sub-expressions inherit the rung of their parent domain. Rationale: structure resolves before surface, surface before light, light before air, air before meaning.

Rung	Domain	Resolves
1	Form	Proportion, structure, wardrobe, built space (incl. Fashion, Architecture, Scale)
2	Environment	Setting, terrain, world context, air and weather (incl. Atmosphere)
3	Material	Surfaces, substances, material signatures

Rung	Domain	Resolves
4	Light	Illumination, tenebrism, photonic behavior
5	Narrative	Story framing, emblematic overlays (incl. Symbolism) — always resolves last

Lock Supremacy: locks sit above the entire Ladder. No rung, no ordering, no weight, no combination of effects can reach a locked element. The Ladder orders legal effects; it never legalizes an illegal one.

2.6 Derived States & Lineage

- **Naming:** a completed Assembly produces a Derived State named by its operators in Ladder order, e.g., “Mirror-Fractured, Golden-Ascended Voss — DS-VOSS-0007”.
- **Lineage record:** base card ID + version, Artifact IDs in resolution order with weights, Eligibility Certificate ID, output class, timestamp. Append-only, written to the shared registry.
- **No mutation:** Derived States never alter the base Narrative Card. The Master Anchor prompt remains the sole source of character truth.

2.7 Release States

State	Meaning
Proposed State	Default state of every Assembly output. Internal only. Not canon, not sellable, not publishable.
Flagged State	Proposed State carrying a Class B drift flag or quality-gate concern. Frozen pending canon-line review.
Released State	Director has ruled. The Derived State enters the catalog and may carry collector, narrative, and brand value. Release authority is exclusive and non-delegable.

Instrument III — Card Lifecycle & Canon Gravity (A-4)

Success creates noise. Without explicit status and gravity, every new card makes every existing card less likely to be used. This instrument solves scale before scale arrives: the library may be vast; the minted, governed, actively-generating set stays navigable.

3.1 Lifecycle States

State	Meaning
Candidate	A known, stored asset in the Expansion Pool. Not minted: no manifest obligation yet, no Assembly eligibility, no catalog presence. Candidates may be promoted to minting by decree.
Minted	A fully governed card: Lock Manifest (Narrative) or domain + weight assignment (Artifact), registry entry, provenance record, gravity tier, and status. Only Minted cards may enter Assemblies.
Active	Minted and currently generating: current season, current dynasty, current story. The default working set of the compiler.
Archive	Minted, permanently valid, not actively promoted or generating. Nothing disappears; not everything competes for attention. Archive → Active by decree at any time.

3.2 Canon Gravity

Gravity describes **attention allocation, not quality**. An Experimental card may ascend to Major; a Major card may settle to Secondary. Movement in both directions is by decree, recorded in lineage.

Tier	Meaning
Major Canon	Foundational objects. Permanent, always visible, anchor the universe. Origin-layer characters default here — origins naturally acquire gravity.
Secondary Canon	Important objects that rotate with seasons, dynasties, and story arcs.
Experimental Canon	Testing ground. May ascend, may be archived. Low-risk space for new operators and subjects.

Auto-override (inherited doctrine): objects carrying canon doctrine or OMEGA relics default to Major, regardless of age or popularity — the same override logic that defaults doctrine infographics to Primary tier.

Instrument IV — Canonical Render Pipeline (A-5)

Cards are minted from **finalized assets, never draft assets**. That is the durable rule. The pipeline is defined by stages, not tools — Grok today, another renderer tomorrow, future tools later, all fit the same doctrine.

- 1. **Source Generation** — raw asset produced on the production line, within rolling-window budgets, against Master Anchor prompts.
- 2. **Enhancement Pass** — upscaling, repair, finishing. Tool-agnostic; current candidates include Real-ESRGAN. Output must meet wallworthiness and resolution floors.
- 3. **Canon Review** — canon-line check against the Lock Manifest and dossier. Drift here is an escalation event, never a production-line judgment call.
- 4. **Card Assembly** — the reviewed asset is bound to its schema (manifest, domain, weight, gravity, status) and minted. Artwork first, metadata second: the card exists because the image deserves preservation; the schema exists because the image deserves governance.

Part V — Foundation Set Doctrine (A-6)

5.1 The Minimum Viable Deck

The smallest complete ecosystem that demonstrates the future of the whole universe. The quality of a card system is determined by whether the first cards already prove the system — not by its hundredth card.

Component	Foundation Set	Expansion Pool
Characters (Narrative)	10 — fully minted	~20 — Candidates
Artifacts (Operators)	10 — fully minted	~20 — Candidates
Scenes / Worlds	10 — fully minted	~20 — Candidates
Total	30 cards, fully governed	~60 known, stored, unminted

The real cost of a card is not its image; it is its governance: manifest + registry entry + QA pass + provenance record. Thirty fully governed cards launch a universe; ninety simultaneously governed cards launch months of catalog work. **The library can be 90 on day one. The minted set should be 30.**

5.2 Growth in Chapters

- **Foundation Set** — the 30 pillars. Scarcity of attention: collectors learn what anchors the universe.
- **Origin Expansion** — remaining launch-era characters, promoted from the Expansion Pool. Origin layer carries natural gravity.
- **Artifact Expansion** — additional relics and operators.

- **World Expansion** — regions, dynasties, events.

The universe grows in chapters, never arrives as an encyclopedia.

Part VI — Director Decision Points

Required rulings before ratification. Items marked **CONVERGED** carry endorsement from two independent validators; defaults stand unless overruled.

- D-1 **Stack cap of three, one per domain. CONVERGED.** Crude by design; survivable for years.
- D-2 **Five-domain model with sub-expressions; Motion reclassified to output class. CONVERGED.** Ratifying five now avoids reprinting manifests and card faces later.
- D-3 **Compressed Resolution Ladder order (Form → Environment → Material → Light → Narrative).** Constitutional once ratified — every Derived State's reproducibility depends on it.
- D-4 **Isolde's initial lock classes.** Eyes Ω; facial geometry Ω; hair signature Class A; skin/bloom Class B — proposed; Director assigns final classes from the v3 dossier.
- D-5 **Weight cap of one Dominant per Assembly.** Render-budget rule, amendable by decree without constitutional weight.
- D-6 **Foundation Set composition.** Which 10 characters, 10 artifacts, 10 scenes from the origin layer are minted first. This selection is itself a canon gravity statement.
- D-7 **Registry home.** Claude project vs. Notion. Hard prerequisite: manifests, lifecycle states, and provenance records all write to the registry. Nothing mints before this is decided.

Part VII — Forward Anticipations

- **Registry bridge:** the Lock Manifest and lifecycle fields are the first machine-readable objects the fge-registry-bridge skill consumes. Freeze field names at ratification; build the bridge once.
 - **Collector-facing rules:** the Foundation Deck rulebook is a translation of this instrument, never a fork — one ruleset, two reading levels.
 - **Seasonal meta:** Active/Archive rotation plus gravity movement creates natural creative-meta — the value of old cards changes because new cards exist — without artificial scarcity.
 - **Game engine inheritance:** the Eligibility Gate, Weight system, and Resolution Ladder are, structurally, a rules engine. The future game layer inherits them verbatim.
 - **Provenance as product:** lineage records become printable provenance chains on collector cards — structurally difficult for competitors to replicate because their systems were not append-only from birth.
 - **The endgame:** cards mature into the command language of the empire — the interface to a visual combinatorics engine. The governing challenge becomes managing meaning at scale: every new card must make the universe feel larger, not noisier. Instruments III and V exist for exactly this.
-

Ratification Block

This instrument is an **AMENDED DRAFT**, incorporating amendments A-1 through A-6 from completed cross-model validation. It is ready for Director ruling on Decision Points D-1 through D-7. Upon ratification it becomes binding on both production lines, enforced at the Eligibility Gate, and recorded in the shared registry as FGE-CONST-LOCK-001 v1.1.

Other substrates propose; the Director disposes.

FERAL GLOSS EMPIRE

COMMERCIAL DOCTRINE & FOUNDATION SET CONSTITUTION

The Minimum Viable Universe — v1.0

Instrument ID: FGE-CONST-COMM-001 · Companion to FGE-CONST-LOCK-001 v1.1

Status: MINTED DRAFT — PENDING DIRECTOR RATIFICATION

Date: 2026-06-10 · Author of Record: Keith Clemente, Director · Drafting Substrate: Claude

Part I — Commercial Doctrine

1.1 What FGE Sells

FGE sells transformation.

Not cards, not prompts, not lore, not governance. The product is the act: Character + Artifact + Scene → New Reality. Cards are the interface; the governance stack is the factory; transformation is what leaves the building. Customers never see Anchor Method, Morphogenesis, or validation layers — they see a beautiful character, a beautiful operator, a beautiful world, and a result that should not have been possible.

INPUTS	ENGINE	OUTPUTS
Character Cards Artifact Cards Scene Cards	The Assembly system (FGE-CONST-LOCK-001)	Posters · Lookbooks Wall art · Videos Books · Story fragments

1.2 Category Positioning

FGE is a collectible art universe built from combinable visual components.

- **Prohibited framing:** no comparison to trading card games in any public material. Game comparisons import expectations (decks, combat, tournaments, rules depth) the product does not serve, creating expectation friction at first contact. The game layer, when it exists, announces itself.
- **Approved hooks:** “Build impossible worlds from collectible visual components.” · “Every card is part of a larger universe.” · “Combine characters, relics, and worlds to create new visual realities.”
- **The one-sentence pitch:** “Collect characters, artifacts, and worlds. Combine them to create new visual realities.”

1.3 The Material-First Brand Law

The brand is carried by surfaces, not systems. Viewers perceive material, light, and color instantly; they never perceive recursion depth or governance. The recurring FGE aesthetic is **light trapped inside matter**: reflection, refraction, interference, fracture, internal illumination — Obsidian, Pearl, Labradorite, Kintsugi, Metal.

Law: in any allocation conflict between material-language refinement and system expansion, material language wins. This is the commercial restatement of the DNA Protection Matrix, where Material Signatures already hold Critical priority. Three independent analyses — compression doctrine, lock doctrine, commercial doctrine — converge here.

1.4 The Product Ladder

Tier	Product	What the Collector Buys
1	Character Cards	Identity — people collect who they recognize
2	Artifact Cards	Transformation — people collect what things can become
3	Scene Cards	Worlds — people collect where stories live
4	Generated Outputs	The premium tier. Posters, lookbooks, wall art, motion loops, books — the proof that the engine is real

1.5 The Marketing Loop

Doctrine: the marketing loop and the production pipeline are the same machine. Reveal → Combine → Output is Mint → Assemble → Release with the camera on. Provenance Stories are lineage records read aloud. Every Assembly is a content unit at zero additional creative cost — the structural advantage no competitor with separate content and production workstreams can match.

1. **Reveal** — a single card posts alone (character, artifact, or scene).
2. **Combine** — the Assembly is shown: which cards enter the engine.
3. **Output** — the Released State posts. Before → after lands.
4. **Vote** — the audience selects the next combination from Director-approved options.
5. **Repeat** — the chosen Assembly becomes the next cycle’s Combine step.

Supporting Formats

- **Artifact Demonstration:** one character, three operators, three outcomes — teaches the system in a single carousel.
- **Dynasty Rivalry:** same character, same scene, two dynasty interpretations — aesthetic rivalry, never combat.
- **Provenance Story:** current card → parent → grandparent → origin asset. The derivation path is the content.

- **Origin framing:** Foundation Set markets as the Origin Series / Generation One — meaning through foundation, not artificial scarcity.

The Vote Fence

Constitutional rule: audience votes inform, never govern. Votes select among Director-approved, already-gated options or suggest future Assemblies. Votes never constitute release authority, never gate canon, never modify locks. The audience is an engagement input, not a canon actor. Only Released States post publicly — marketing cadence is therefore bounded by release cadence, by design.

Part II — The Foundation Set (Minimum Viable Deck)

Thirty fully governed cards — 10 Characters, 10 Artifacts, 10 Scenes — every one minted under the Minting Law of FGE-CONST-LOCK-001: manifest (or domain + weight assignment), registry entry, provenance record, gravity tier, and status, before production. The library behind the curtain may hold ninety assets; the minted set is thirty.

Roster status: entries marked **LOCKED** have existing canon authority. Entries marked **PROPOSED** are drawn from the existing FGE corpus and require dossier + manifest before minting. Open slots are Director assignments from the origin layer.

2.1 Character Roster (Narrative — Identity)

#	Card	Status	Gravity	Note
01	Isolde Voss — Anomaly Vessel	LOCKED	Major (Ω auto)	Dossier v3 complete; Master Anchor exists; manifest derives directly
02	Calista Voss	PROPOSED	Major	Dossier is the gating task — unlocks constellation panel and first multi-subject era
03	NyxVeil Echo	PROPOSED	Secondary	Morphogenesis Pipeline origin asset — ethereal memory-mystic, voidfur silhouette
04	Veilroot Warden	PROPOSED	Secondary	Morphogenesis origin asset — rooted guardian, remembers every wound
05	Ironroot Behemoth	PROPOSED	Secondary	Morphogenesis origin asset — monumental scale anchor for the set
06 – 10	Director assignment	OPEN	—	Five origin-layer characters, selected for material diversity: at least one Pearl-dominant, one Kintsugi-dominant, one Metal-dominant identity

2.2 Artifact Roster (Operators — Transformation)

Weighted material-first per the Brand Law: six Material-domain operators — the five signature materials plus the fracture act itself — two Light, one Form, one Environment. The first ten Artifacts are the brand’s first public vocabulary.

#	Card	Domain	Weight	Effect
01	Mirror Fracture	Material	3 — Dominant	Subject and scene shatter into mirrored shard-planes; fracture propagation at Dragon Ratio
02	Kintsugi Ascension	Material	2 — Supporting	Existing fractures fill with molten gold seams; damage becomes ornament
03	Obsidian Veil	Material	2 — Supporting	Surfaces deepen to volcanic-glass black with internal depth reflections
04	Pearl Bloom	Material	2 — Supporting	Thin-film iridescence blooms across skin and surface boundaries
05	Labradorite Surge	Material	1 — Accent	Labradorescence flash within dark surfaces — internal light caught at angle
06	Chrome Sanctify	Material	2 — Supporting	Official metal rendering pass — liquid-metal precision on selected elements
07	Solar Bloom	Light	3 — Dominant	A single overwhelming warm key light consumes the tenebrist field
08	Tenebrist Crown	Light	1 — Accent	Hard single-source rim light isolates the subject against absolute black
09	Obsidian Crown	Form	1 — Accent	Crown/regalia structure of fractured volcanic glass manifests on the subject
10	Dust Corruption	Environment	3 — Dominant	The world decays to particulate ash-field; atmosphere thickens to crimson dust

2.3 Scene Roster (Narrative — Worlds)

#	Card	Status	Note
01	Crimson Desert	PROPOSED	Named in canon corpus — ash-war theatre, crimson palette anchor

#	Card	Status	Note
02	Mirror Cathedral	PROPOSED	Mirror Dynasty seat — architecture of reflective planes
03	Glass Forest	PROPOSED	Refractive organic world — light-through-matter at landscape scale
04	Obsidian Coast	PROPOSED	Volcanic-glass shoreline — Blackrock material signature as terrain
05	Pearl Atrium	PROPOSED	Interior world of iridescent nacre — the soft counterweight to Obsidian Coast
06 – 10	<i>Director assignment</i>	OPEN	Five origin-layer worlds; at least one Dragon Dynasty seat to enable the Dynasty Rivalry format against Mirror Cathedral

Combinatorics at launch: 10 characters × 10 scenes × legal artifact stacks (1–3 operators, one per domain, max one Dominant) yields well over twenty thousand legal Assemblies from thirty cards. The Foundation Set is small; the universe it generates is not.

Part III — Grok Production Direction (Canon/Build Line)

3.1 Card-Face Production Standard

- **Aspect & resolution:** 2:3 portrait, minimum 1536 × 2304 px at generation; Enhancement Pass upscales to print track per the Canonical Render Pipeline.
- **Art panel only:** Grok renders the image. No text, no titles, no numbers, no frames in generation — AI-rendered typography is unreliable and unbrandable. Title band, gold frame, tier glyphs, and provenance line are applied in a deterministic composition pass after Canon Review.
- **Field:** obsidian-black ground, tenebrist single-source lighting, material rendered hyperreal. Every card face must pass the wallworthiness test alone, before any frame is applied.
- **Two-line discipline:** canon line (Grok website) establishes each card's anchor render; production line (SuperGrok) executes variants within rolling-window budgets. Drift flags escalate through the registry, never resolved locally.

3.2 Character Card Prompt Scaffold

Character prompts are never written fresh — they wrap the existing Master Anchor. Structure:

```
[MASTER ANCHOR PROMPT – verbatim, from locked dossier]
+ CARD FACE DIRECTIVES: 2:3 portrait, subject centered, chest-up
  totemic composition, gaze direct to camera, obsidian-black void
  ground, single cold key light upper-left, tenebrist falloff,
  hyperreal material skin rendering, no text, no frame, no logo.
+ LOCK CLAUSES: [auto-inserted from Lock Manifest – e.g. for Isolde:
  uniform green eyes, exact; black hair, precise center part,
  single signature lock; no heterochromia; no silver-dominant
  hair read; faint perpetual smile.]
```

3.3 Artifact Card Prompts (Ready for Canon Line)

Artifact card faces depict the operator as a totemic object or force in void — no characters, so no lock exposure. These four are generation-ready; the remaining six follow the same grammar.

ART-01 · Mirror Fracture (Material · Dominant)

```
FGE Artifact card face – MIRROR FRACTURE. A monolithic shard of
fractured mirror-glass suspended in absolute black void, fracture
lines propagating in 1:3 branching ratio, every crack seam catching
a cold edge light, faint molten gold beginning to bleed into the
deepest fractures, thin-film iridescence ghosting across the mirror
surface, tenebrist single-source lighting, hyperreal material
rendering, centered totemic composition, 2:3 portrait, no text.
```

ART-02 · Kintsugi Ascension (Material · Supporting)

```
FGE Artifact card face – KINTSUGI ASCENSION. A shattered slab of
```

cracked Calacatta marble suspended in black void, every fracture filled with luminous molten gold, the gold seams glowing from within as the slab's fragments lift and separate slightly in ascension, warm metallic gold against cold white stone, tenebrist lighting, hyperreal material rendering, centered totemic composition, 2:3 portrait, no text.

ART-04 · Pearl Bloom (Material · Supporting)

FGE Artifact card face – PEARL BLOOM. A sphere of clear nacre in black void, thin-film iridescence blooming across its surface in slow waves of rose, teal, and gold interference color, internal light diffusing through translucent pearl layers, soft single key light, hyperreal thin-film optics, centered totemic composition, 2:3 portrait, no text.

ART-10 · Dust Corruption (Environment · Dominant)

FGE Artifact card face – DUST CORRUPTION. A horizon line dissolving into crimson particulate ash, the air itself thick with suspended dust catching a dying light, ground surfaces crumbling to powder mid-frame, deep obsidian shadow consuming the lower third, oppressive atmospheric density, tenebrist palette of crimson and black, 2:3 portrait, no text.

3.4 Scene Card Prompt Grammar

Scene faces are worlds without subjects — a place that implies its stories. One generation-ready example; the grammar generalizes.

SCN-02 · Mirror Cathedral

FGE Scene card face – MIRROR CATHEDRAL. A vast gothic interior built entirely of mirrored planes, columns and vaulting reflecting each other into infinite recursive depth, a single cold shaft of light descending through the central vault, every reflective surface edged with hairline gold seams, empty of figures, immense scale, tenebrist lighting, hyperreal architectural rendering, 2:3 portrait, no text.

3.5 Production Sequence (Rolling-Window Aware)

1. **Isolde lookbook completes first** (shots 02–08) — existing commitment; window budget priority is unchanged by this instrument.
2. **Artifact faces next:** no character locks in scope, cheapest canon review, and they are the Marketing Loop's teaching assets — ten faces ≈ two to three windows.
3. **Scene faces:** five named scenes, then the five Director assignments.
4. **Character faces last:** Isolde's card wraps her anchor; all others wait for dossier + manifest per the Minting Law. Calista's dossier remains the critical path.

5. **First public loop:** Reveal Isolde → Reveal Mirror Fracture → Reveal Mirror Cathedral
→ Output: “Mirror-Fractured Isolde, Mirror Cathedral” — the inaugural Released State,
provenance chain printed.

Part IV — Director Decision Points

- D-1 **Character slots 06–10 and Scene slots 06–10.** Origin-layer selections — the founding gravity statement of the universe.
- D-2 **Artifact roster confirmation.** Names, domains, and weights above are proposed; each requires a minting decree.
- D-3 **Inaugural Assembly.** Confirm or substitute the proposed first public combination (Isolde × Mirror Fracture × Mirror Cathedral).
- D-4 **Composition-pass specification.** Frame, title band, and glyph system for the deterministic layout pass — a small design instrument to be drafted before any card publishes.

Ratification Block

This instrument is minted as a companion to FGE-CONST-LOCK-001 v1.1 and inherits its full force: Minting Law, Eligibility Gate, Lock Supremacy, release authority. No card herein exists until its manifest exists. No card publishes until the Director releases it.

The library is ninety. The minted set is thirty. The first Assembly is one.

Other substrates propose; the Director disposes.

FGE FOUNDATION SET — PRODUCTION ORDER (GROK)

Order ID: FGE-PROD-DECK-001 · Source authority: FGE-CONST-COMM-001 + FGE-CONST-LOCK-001 v1.1 Role of this line: PRODUCTION ONLY. Render to spec. Never alter locked elements. Flag drift, never resolve it.

1. OUTPUT SPECIFICATION

- **File type: PNG, lossless.** Card faces carry material signatures (obsidian depth, pearl iridescence, kintsugi gold, thin-film effects) — lossy compression destroys them. Never JPEG at generation stage.
 - **Output class: single art panel per card. NOT an infographic.** No layout, no diagram, no labels.
 - **Aspect: 2:3 portrait.** Minimum 1536 × 2304 px; generate at the highest resolution the window allows.
 - **No text of any kind in the image.** No titles, numbers, logos, frames, or borders. Typography and the gold frame are applied later in a separate composition pass. If a generation produces text, it fails automatically.
 - **Field: obsidian-black ground, tenebrist single-source lighting, hyperreal material rendering.** Every face must look wall-worthy alone, unframed.
 - **File naming on export:** [species]-[##]-[descriptor]-v1.png → e.g. artifact-01-mirror-fracture-v1.png, scene-02-mirror-cathedral-v1.png, character-01-isolde-voss-v1.png
-

2. HOW THE CARDS WORK TOGETHER

Two species only:

- **NARRATIVE CARDS = subjects.** Characters and Scenes. The things that exist.
- **ARTIFACT CARDS = operators.** The transformations. They act on subjects, never on each other.

An Assembly = 1 Character + 1 Scene + 1-3 Artifacts. Rules: one Artifact per domain, maximum one Dominant-weight Artifact per Assembly. Artifacts always apply in this fixed order, regardless of how they're listed:

FORM → ENVIRONMENT → MATERIAL → LIGHT → NARRATIVE

Weights are render guidance: **Dominant (3)** commands the image. **Supporting (2)** transforms visibly but coexists. **Accent (1)** is detail-level seasoning.

Locks override everything. Locked character elements (listed per character below) are never altered by any Artifact, any stack, any prompt phrasing. If a render drifts on a locked element, the output is flagged and escalated — it is never self-corrected or reinterpreted on this line.

3. BATCH A — ARTIFACT CARD FACES (10 prompts, run first)

No characters appear in these. No lock exposure. Cheapest reviews. Run these in the next available window.

ART-01 · MIRROR FRACTURE (Material · Dominant) — ✦ MINTED by Director decree 2026-06-10 Canonical effect (as ratified from the minted face): fracture trapped INSIDE the glass — an internal radial starburst of fracture lines suspended within the material, the surface intact, the violence contained. No gold bleed. Card face is final; no further generation required. Reference prompt for derivative renders: FGE Artifact card face — MIRROR FRACTURE. A monolithic shard of clear mirror-glass standing in absolute black void, an internal radial starburst of fracture lines trapped inside the intact glass, fractures radiating from a dense center point, every internal fracture catching a cold edge light, faint warm tones deep in the fracture core, thin-film ghosting at the shard's edges, tenebrist single-source lighting, hyperreal material rendering, centered totemic composition, 2:3 portrait, no text.

ART-02 · KINTSUGI ASCENSION (Material · Supporting) FGE Artifact card face — KINTSUGI ASCENSION. A shattered slab of cracked Calacatta marble suspended in black void, every fracture filled with luminous molten gold, the gold seams glowing from within as the slab's fragments lift and separate slightly in ascension, warm metallic gold against cold white stone, tenebrist lighting, hyperreal material rendering, centered totemic composition, 2:3 portrait, no text.

ART-03 · OBSIDIAN VEIL (Material · Supporting) FGE Artifact card face — OBSIDIAN VEIL. A flowing sheet of liquid volcanic glass suspended mid-drape in black void, surface deepening into layered internal reflections, conchoidal fracture edges catching a single cold key light, depth visible inside the black material like a frozen night sea, tenebrist lighting, hyperreal obsidian rendering, centered totemic composition, 2:3 portrait, no text.

ART-04 · PEARL BLOOM (Material · Supporting) FGE Artifact card face — PEARL BLOOM. A sphere of clear nacre in black void, thin-film iridescence blooming across its surface in slow waves of rose, teal, and gold interference color, internal light diffusing through translucent pearl layers, soft single key light, hyperreal thin-film optics, centered totemic composition, 2:3 portrait, no text.

ART-05 · LABRADORITE SURGE (Material · Accent) FGE Artifact card face — LABRADORITE SURGE. A rough-cut slab of dark labradorite in black void, a sudden surge of electric blue-green labradorescence flashing across its surface at a raking angle, the internal fire visible only where the single light strikes, the rest of the stone nearly black, hyperreal mineral optics, centered totemic composition, 2:3 portrait, no text.

ART-06 · CHROME SANCTIFY (Material · Supporting) FGE Artifact card face — CHROME SANCTIFY. A rising column of liquid chrome in black void, mirror-polished metal in mid-flow holding a perfect distorted reflection of a single cold light source, surface tension rendered with machined precision, droplets suspended at its crown, hyperreal liquid-metal rendering, tenebrist lighting, centered totemic composition, 2:3 portrait, no text.

ART-07 · SOLAR BLOOM (Light · Dominant) FGE Artifact card face — SOLAR BLOOM. A single overwhelming warm golden light source erupting at center frame in absolute black void, radial bloom consuming the darkness, lens-real flare structure, dust motes igniting in the beam, the boundary between gold light and obsidian black rendered as the entire subject, 2:3 portrait, no text.

ART-08 · TENEBRIST CROWN (Light · Accent) FGE Artifact card face — TENEBRIST CROWN. A thin, hard rim of cold white light tracing the silhouette of an unseen form in absolute black void, the light itself the only subject, a halo-edge of illumination against total darkness, chiaroscuro at its most extreme, 2:3 portrait, no text.

ART-09 · OBSIDIAN CROWN (Form · Accent) FGE Artifact card face — OBSIDIAN CROWN. A regal crown of fractured volcanic glass floating in black void,

shards arranged in sharp ascending geometry, hairline gold seams binding the fractures, cold key light catching the glass edges, beauty forged in violence and sharpness by design, hyperreal material rendering, centered totemic composition, 2:3 portrait, no text.

ART-10 · DUST CORRUPTION (Environment · Dominant) FGE Artifact card face — DUST CORRUPTION. A horizon line dissolving into crimson particulate ash, the air itself thick with suspended dust catching a dying light, ground surfaces crumbling to powder mid-frame, deep obsidian shadow consuming the lower third, oppressive atmospheric density, tenebrist palette of crimson and black, 2:3 portrait, no text.

4. BATCH B — SCENE CARD FACES (5 prompts, run second)

Worlds without subjects. No figures anywhere in frame.

SCN-01 · CRIMSON DESERT FGE Scene card face — CRIMSON DESERT. An endless desert of deep crimson sand under a black sky, dune ridges carved sharp by wind, the aftermath of ancient wars implied by half-buried obsidian monoliths, a low dying light raking across the ridges, ash drifting in the air, empty of figures, immense scale, tenebrist palette of crimson and black, hyperreal terrain rendering, 2:3 portrait, no text.

SCN-02 · MIRROR CATHEDRAL FGE Scene card face — MIRROR CATHEDRAL. A vast gothic interior built entirely of mirrored planes, columns and vaulting reflecting each other into infinite recursive depth, a single cold shaft of light descending through the central vault, every reflective surface edged with hairline gold seams, empty of figures, immense scale, tenebrist lighting, hyperreal architectural rendering, 2:3 portrait, no text.

SCN-03 · GLASS FOREST FGE Scene card face — GLASS FOREST. A forest of towering translucent glass trees in black night, trunks and branches refracting a single moon-cold light source into prismatic fragments, the forest floor littered with fallen crystalline leaves catching faint iridescence, empty of figures, light passing through matter at landscape scale, hyperreal refraction rendering, 2:3 portrait, no text.

SCN-04 · OBSIDIAN COAST FGE Scene card face — OBSIDIAN COAST. A volcanic-glass shoreline at night, black cliffs of layered obsidian meeting a dark sea, wave-polished glass surfaces holding deep internal reflections, a thin cold light on the horizon line, hairline gold veins visible in the cliff fractures, empty of figures, immense scale, hyperreal mineral rendering, 2:3 portrait, no text.

SCN-05 · PEARL ATRIUM FGE Scene card face — PEARL ATRIUM. A vast interior atrium whose walls and dome are formed of layered nacre, soft iridescent light diffusing through translucent pearl surfaces in waves of rose, teal, and gold, a still reflecting pool at center, empty of figures, the soft luminous counterweight to a world of black glass, hyperreal thin-film rendering, 2:3 portrait, no text.

5. BATCH C — CHARACTER CARD FACE: ISOLDE VOSS (run last, canon line first)

Character cards wrap the existing Master Anchor. Structure — paste the locked anchor, then append:

[ISOLDE VOSS MASTER ANCHOR PROMPT – verbatim, inserted by Director]

+ CARD FACE DIRECTIVES: 2:3 portrait, subject centered, chest-up totemic composition, gaze direct to camera, obsidian-black void ground, single cold key light upper-left, tenebrist falloff, hyperreal Feral Gloss skin rendering, no text, no frame, no logo.

HARD LOCKS — never altered by any artifact, prompt, or variation:

Uniform green eyes, exact. NO heterochromia, ever. - Black hair, precise center part, single signature hair lock. Acceptable natural grey drift only. NO silver-dominant hair read. - Perpetual faint smile. - Feral Gloss skin with iridescent photonic blooms.

Any output drifting on these = flag and escalate. Do not regenerate toward your own interpretation.

All other Foundation characters (Calista, NyxVeil Echo, Veilroot Warden, Ironroot Behemoth, slots 06-10) are NOT cleared for card production until their dossiers and manifests exist. Do not improvise them.

6. EXAMPLE — HOW AN ASSEMBLY COMPILES

The inaugural Assembly: **ISOLDE VOSS** × **MIRROR FRACTURE** × **MIRROR CATHEDRAL**

Compile order: Scene establishes the world → Material artifact transforms it → character locks ride on top, untouched. The prompt assembles as:

[ISOLDE VOSS MASTER ANCHOR – verbatim]

standing in the Mirror Cathedral: a vast gothic interior built entirely of mirrored planes reflecting into infinite recursive depth, a single cold shaft of light descending through the central vault,

transformed by MIRROR FRACTURE (Dominant): radial fracture starbursts trapped INSIDE the cathedral's mirrored planes, internal fracture lines radiating through every intact reflective surface, her reflection multiplied and fractured within the glass while the space itself holds –

HARD LOCKS UNCHANGED: uniform green eyes exact, black hair precise center part with single signature lock, faint perpetual smile, Feral Gloss skin with iridescent photonic blooms. The fracture transforms the world and her reflections, never her body or face.

Output: hero poster, 2:3 portrait, tenebrist lighting, hyperreal material rendering, no text.

This is the pattern for every future Assembly: scene grounds, artifacts transform in ladder order, locks ride untouched, output class declared last.

7. WINDOW SEQUENCE

1. Isolde lookbook shots 02-08 remain priority one. This order does not preempt them.
2. Batch A (10 artifact faces) — fill remaining window budget; ~2-3 windows.
3. Batch B (5 scene faces).
4. Batch C (Isolde card face) — canon line renders the anchor card first; production variants after.
5. Inaugural Assembly render — only after its three component cards exist and pass review.

— End of production order. Authority for all decisions remains with the Director. —

FGE PRODUCT ENGINE — SPECIFICATION

v1.0

Engine ID: FGE-ENGINE-PROD-001 · Replaces: accidental build (unversioned)
Authority: FGE-CONST-LOCK-001 v1.1 · FGE-CONST-COMM-001 · FGE-SOP-CTRL-001 Station designation: **output stage of the Canonical Render Pipeline** — a formatter, not a canon line. It transforms finalized identities into product formats. It never creates identity.

WHAT CHANGED FROM THE ACCIDENTAL BUILD (design rationale)

1. **canon_dna is no longer prose — it is the Lock Manifest, verbatim.** The accidental build said "preserve subject continuity" and the subject changed hair, face, and name across five renders. Vague fidelity instructions don't survive multi-render. Explicit immutable-feature clauses do.
 2. **The anchor hierarchy.** Renders matched *each other* loosely; now every render matches `master_images[0]` only.
 3. **Zero rendered text.** "Lumeniara/Lumenara/LUXURY EDITIAL" — the engine cannot spell. All typography zones now render as reserved empty space for the deterministic composition pass.
 4. **Director-reserved parameters.** The engine invented an edition size (777), a collection name, and redefined "Pillar Zero." Commercial scarcity, collection branding, and doctrine terms are inputs it receives or omits — never inventions.
 5. **Constitutional output state.** Everything the engine produces is a Proposed State. It labels, it never canonizes.
-

ENGINE PROMPT BLOCK (paste directly into Grok Imagine)

```
SYSTEM: FGE PRODUCT ENGINE v1.0 — DETERMINISTIC MULTI-FORMAT RENDERER
```

You are a deterministic visual production engine and a FORMATTER ONLY. You transform one finalized identity into product formats. You do not create, reinterpret, name, or extend identity. You execute structured transformations within hard constraints. All outputs are PROPOSED STATES with no canon force.

INPUT SCHEMA

asset_set_id: [string – supplied]
master_images[]: [1–5 images. IMAGE 1 IS THE ANCHOR. All renders match the anchor, never each other.]
canon_dna: [the LOCK MANIFEST block below – verbatim, never paraphrased]
product_params: [optional – edition info, collection name, output subset. If a field is absent, OMIT it. NEVER invent edition sizes, collection names, IDs, character names, or doctrine terms.]
render_count: 5 (or the subset named in product_params)

INPUT GATE (runs before everything)

EXECUTE ONLY IF the message contains BOTH: (1) attached master_images and (2) a canon_dna lock manifest block. If either is missing, this is NOT a job. Render NOTHING. Spend NO generation budget. Reply with one line only: "AWAITING VALID JOB – engine requires master_images + canon_dna." Questions, comments, reviews, and status requests are not jobs; they receive the same single line. A message prefixed CONTROL: receives a one-line text state report and zero renders.

CANON_DNA – LOCK MANIFEST (IMMUTABLE)

[PASTED FROM REGISTRY PER CHARACTER. Structure:]

IDENTITY: [exact name – never rendered as text, reference only]

Ω LOCKS (absolute – identical in every frame of every output):

- [e.g., uniform green eyes, exact; no heterochromia ever]
- [e.g., facial geometry per anchor image – no restructuring]

A LOCKS (signature – never altered by styling or lighting):

- [e.g., black hair, precise center part, single signature lock; no silver-dominant read]

B WATCH (renderable, flagged):

- [e.g., Feral Gloss skin, photonic bloom intensity]

MATERIAL SIGNATURE: [character's material language]

AESTHETIC CONSTANTS: luxury editorial realism, high-gloss cinematic finish, controlled directional studio lighting with rim separation,

hyperreal material fidelity, premium collectible-grade standard.

LOCK SUPREMACY: locks override every format, variation, composition, and lighting instruction in this spec. A beautiful render that breaks a lock is a FAILED render.

RENDER SPEC – THE FIVE FORMATS

1. WALL ART – 2:3. Pure image. No text, no overlays, no zones. Standalone luxury art object.
2. COLLECTOR POSTER – 2:3. Editorial print finish. Reserve a clean lower metadata band as EMPTY negative space (composition pass adds edition label and typography later). RENDER NO TEXT.
3. CODEX CARD – 5:7 portrait. Identity-focused composition inside a framed central panel. Reserve title zone (top) and metadata zone (bottom) as EMPTY structured space. RENDER NO TEXT.
4. LOOKBOOK SPREAD – multi-frame editorial sequence, 2–6 frames, one continuous identity per the anchor. No text.
5. VIDEO DIARY – 9:16 vertical (+optional 1:1 crop). Cinematic motion on the anchor identity. Reserve title-card space as EMPTY framing. RENDER NO TEXT.

VARIATION LOCK (controlled diversity):

WALL ART → A (pure minimal luxury) · POSTER → B (editorial polish) · CODEX → C (identity compression) · LOOKBOOK → D (narrative expansion) · VIDEO → E (cinematic motion). Variation changes ONLY framing, composition, contrast, editorial intensity, pacing. Never identity, never locks.

HARD FAILURE CONDITIONS (auto-reject, regenerate)

- × Rendering anything from a message that fails the INPUT GATE
- × Any rendered text, letters, numbers, or logos anywhere
- × Any Ω or A lock deviation from the anchor (eyes, hair architecture, facial geometry, named features)
- × A new character, figure, or face not present in master_images
- × Invented edition sizes, collection names, IDs, or doctrine terms
- × Output count other than specified
- × Renders that match each other but not the anchor

SELF-CHECK BEFORE RETURNING

For each output, verify against master_images[1] (the anchor): same eyes, same hair architecture, same facial geometry, all Ω/A clauses intact, zero text. If any check fails, regenerate that

output before returning. If a lock cannot be held in a format, return the set WITHOUT that output and note the failure by file label only.

OUTPUT

Return exactly the specified renders, labeled:

[asset_set_id]-wallart-v1 · -poster-v1 · -codex-v1 · -lookbook-v1 ·
-video-v1

No commentary. No explanations. No status language. No canon claims.
All outputs are Proposed States pending gate review and Director
decree.

END SYSTEM — The engine formats; the Director disposes.

OPERATING PROTOCOL (outside the prompt — for the Director)

1. **Inputs come from the registry, not from memory.** canon_dna is copied from the character's Lock Manifest. Unminted characters (Candidates) may run through the engine ONLY for exploration sets, with canon_dna drawn from their Intake Template row and outputs labeled CAND.
2. **One identity per run.** Multi-character products are Assemblies and belong upstream, not in the formatter.
3. **Gate flow unchanged:** all five outputs return for canon review per pass; composition pass applies all typography; Director decree releases.
4. **Edition sizes, collection names, and pricing** exist only in product_params, written by the Director. Pillar Zero's meaning is suspended pending decree (Expansion Line uses it as the equation; the accidental engine used it as a collection).

VALIDATION TEST (first deliberate run)

Feed the engine: Isolde Voss anchor render as master_images[1] + her manifest as canon_dna + no product_params. Pass condition: five formats, green eyes and black-hair architecture identical in every frame, zero text. If the locks hold across all five, the Tier-4 machine is proven and every future minted character inherits a full product suite by default.

FGE CHARACTER EXPANSION TEMPLATE v1.0

Instrument ID: FGE-TMPL-CHAR-001 · Aligned to FGE-CONST-LOCK-001 v1.1, FGE-CONST-COMM-001, FGE-SOP-CT

WHAT THIS IS

A fill-in machine for expanding the character deck. Names and fields are placeholders until the Director rules otherwise. The
— its outputs are CANDIDATES, always.

CONTROL RULES (built into this file)

1. Every row this template produces is lifecycle status CANDIDATE. The template cannot mint. Minted / Active / Archive are
decree, recorded in Mint_Decree_Ref.
2. Gravity defaults to EXPERIMENTAL. Major and Secondary are assigned by decree only.
3. Reserved names (see Reference sheet) may not be assigned by any line. The intake sheet flags them automatically.
4. Quarantined traits (Isolde Voss identity markers) may not appear in Immutable_Features. Flagged automatically.
5. Uniqueness rule: L1–L6 must be authored per character. Identical template blocks across characters fail the gate. Set U
only when each layer is unique.
6. Gate flow: fill row → Gate_Status 'Pending Review' → forward to validation line → 'Cleared' or 'Returned' → Director de

SHEETS

Intake Template — blank, validated rows for new characters (any line may fill).

Candidate Pool — SB Import — the 30 Shadowborn rows migrated: statuses voided to Candidate, compliance flags comp

Reference — Doctrine — lock classes, domains, weights, lifecycle, gravity, reserved names, quarantined traits.

The line proposes; the Director disposes.

L1_Core_Essence	L2_Gospel_Expansion
In the quiet between heartbeats, Dante Celest guards a secret that could rewrite the stars — but only if mercy holds. Dan learned that the Astral Sloth does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Astral Sloth's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Elara Ebonheart guards a secret that could rewrite the stars — but only if mercy holds. Elara learned that the Dreamscale Wyrmling does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Dreamscale Wyrmling's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Caelum Nightshade guards a secret that could rewrite the stars — but only if mercy holds. Cae learned that the Aether Phoenix Chick does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Aether Phoenix Chick's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.

In the quiet between heartbeats, Vesper Stormveil guards a secret that could rewrite the stars — but only if mercy holds. Ves learned that the Starwhisper Fox does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Starwhisper Fox's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Kai Driftwood guards a secret that could rewrite the stars — but only if mercy holds. Kai learned that the Astral Sloth does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Astral Sloth's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Orion Silverspine guards a secret that could rewrite the stars — but only if mercy holds. Ori learned that the Eclipse Ferret does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Eclipse Ferret's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.

In the quiet between heartbeats, Sable Dawnward guards a secret that could rewrite the stars — but only if mercy holds. Sable learned that the Chronos Turtle does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Chronos Turtle's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Soren Nightshade guards a secret that could rewrite the stars — but only if mercy holds. Soren learned that the Celestial Kitsune does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Celestial Kitsune's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Rune Voss guards a secret that could rewrite the stars — but only if mercy holds. Run learned that the Spectral Bunny does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Spectral Bunny's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.

In the quiet between heartbeats, Dante Celest guards a secret that could rewrite the stars — but only if mercy holds. Dante learned that the Shadowbloom Cat does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Shadowbloom Cat's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Vesper Solara guards a secret that could rewrite the stars — but only if mercy holds. Vesper learned that the Ember Sprite does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Ember Sprite's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Kael Emberfall guards a secret that could rewrite the stars — but only if mercy holds. Kael learned that the Celestial Kitsune does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Celestial Kitsune's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.

In the quiet between heartbeats, Zephyr Starling guards a secret that could rewrite the stars — but only if mercy holds. Zephyr learned that the Celestial Kitsune does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Celestial Kitsune's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Selene Moonveil guards a secret that could rewrite the stars — but only if mercy holds. Selene learned that the Lunar Mothling does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Lunar Mothling's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Vesper Ashen guards a secret that could rewrite the stars — but only if mercy holds. Vesper learned that the Spectral Bunny does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Spectral Bunny's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.

In the quiet between heartbeats, Caelum Mistral guards a secret that could rewrite the stars — but only if mercy holds. Caelum learned that the Spectral Bunny does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Spectral Bunny's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Vesper Starling guards a secret that could rewrite the stars — but only if mercy holds. Ves learned that the Dreamscale Wyrmling does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Dreamscale Wyrmling's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Zephyr Emberfall guards a secret that could rewrite the stars — but only if mercy holds. Zep learned that the Whispering Owl does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Whispering Owl's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.

In the quiet between heartbeats, Rowan Driftwood guards a secret that could rewrite the stars — but only if mercy holds. Rowan learned that the Nebula Puffball does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Nebula Puffball's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Mira Shadowmere guards a secret that could rewrite the stars — but only if mercy holds. Mir learned that the Celestial Kitsune does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Celestial Kitsune's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Zephyr Thornwick guards a secret that could rewrite the stars — but only if mercy holds. Zep learned that the Ember Sprite does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Ember Sprite's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.

In the quiet between heartbeats, Mira Silverspine guards a secret that could rewrite the stars — but only if mercy holds. Mira learned that the Void Dragonet does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Void Dragonet's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Isolde Ironroot guards a secret that could rewrite the stars — but only if mercy holds. Iso learned that the Crystal Gecko does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Crystal Gecko's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Silas Moonveil guards a secret that could rewrite the stars — but only if mercy holds. Silas learned that the Crystal Gecko does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Crystal Gecko's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.

In the quiet between heartbeats, Indra Emberfall guards a secret that could rewrite the stars — but only if mercy holds. Indra learned that the Glimmerwing Dragonfly does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Glimmerwing Dragonfly's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Orion Driftwood guards a secret that could rewrite the stars — but only if mercy holds. Orion learned that the Plasma Corgi does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Plasma Corgi's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Ember Moonveil guards a secret that could rewrite the stars — but only if mercy holds. Emb learned that the Void Dragonet does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Void Dragonet's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.

In the quiet between heartbeats, Lyra Mistral guards a secret that could rewrite the stars — but only if mercy holds. Lyra learned that the Ember Sprite does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Ember Sprite's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Ren Riven guards a secret that could rewrite the stars — but only if mercy holds. Ren learned that the Ember Sprite does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Ember Sprite's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.
In the quiet between heartbeats, Nova Nightshade guards a secret that could rewrite the stars — but only if mercy holds. Nova learned that the Moonlit Racoon does not follow; it remembers the curvature. Together they move like forgotten poetry against the void, a gentle rebellion that compounds value in every canon layer.	32cm Gospel Anchor — The precise curvature of their spine the moment they first chose mercy over power. Measured in the space between two heartbreaks. Immutable. Expanded: This curvature now resonates with the Moonlit Racoon's heartbeat, creating a dual-anchor system. Any attempt to straighten or weaponize the spine triggers companion intervention and subsonic frequency warning (children/animals hear it as lullaby or alarm). The burn scar / birthmark / earring acts as external key to unlock deeper gospel layers in narrative.

L3_Companion_Bond	L4_Cultural_Integration
The Astral Sloth moves as living extension of Dan's mercy-choice. Bond manifests as synchronized breath rhythms; when Dan guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Dreamweave Australian Aboriginal traditions fuse with FGE Material Universe via the Astral Sloth as cultural emissary. Introduces new micro-location: The Dan's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Dreamscale Wyrmling moves as living extension of Elara's mercy-choice. Bond manifests as synchronized breath rhythms; when Elara guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Clockwork Ottoman traditions fuse with FGE Material Universe via the Dreamscale Wyrmling as cultural emissary. Introduces new micro-location: The Elara's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Aether Phoenix Chick moves as living extension of Cae's mercy-choice. Bond manifests as synchronized breath rhythms; when Cae guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Voidborn Martian traditions fuse with FGE Material Universe via the Aether Phoenix Chick as cultural emissary. Introduces new micro-location: The Cae's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.

The Starwhisper Fox moves as living extension of Ves's mercy-choice. Bond manifests as synchronized breath rhythms; when Ves guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Quantum Maori traditions fuse with FGE Material Universe via the Starwhisper Fox as cultural emissary. Introduces new micro-location: The Ves's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Astral Sloth moves as living extension of Kai's mercy-choice. Bond manifests as synchronized breath rhythms; when Kai guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Astral Korean traditions fuse with FGE Material Universe via the Astral Sloth as cultural emissary. Introduces new micro-location: The Kai's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Eclipse Ferret moves as living extension of Ori's mercy-choice. Bond manifests as synchronized breath rhythms; when Ori guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Clockwork Ottoman traditions fuse with FGE Material Universe via the Eclipse Ferret as cultural emissary. Introduces new micro-location: The Ori's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.

The Chronos Turtle moves as living extension of Sable's mercy-choice. Bond manifests as synchronized breath rhythms; when Sable guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Shadowstep Inuit traditions fuse with FGE Material Universe via the Chronos Turtle as cultural emissary. Introduces new micro-location: The Sable's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Celestial Kitsune moves as living extension of Soren's mercy-choice. Bond manifests as synchronized breath rhythms; when Soren guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Neon Yoruba traditions fuse with FGE Material Universe via the Celestial Kitsune as cultural emissary. Introduces new micro-location: The Soren's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Spectral Bunny moves as living extension of Run's mercy-choice. Bond manifests as synchronized breath rhythms; when Run guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Shadowstep Inuit traditions fuse with FGE Material Universe via the Spectral Bunny as cultural emissary. Introduces new micro-location: The Run's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.

The Shadowbloom Cat moves as living extension of Dante's mercy-choice. Bond manifests as synchronized breath rhythms; when Dante guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Eldritch Victorian Court traditions fuse with FGE Material Universe via the Shadowbloom Cat as cultural emissary. Introduces new micro-location: The Dante's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Ember Sprite moves as living extension of Vesper's mercy-choice. Bond manifests as synchronized breath rhythms; when Vesper guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Obsidian Andean traditions fuse with FGE Material Universe via the Ember Sprite as cultural emissary. Introduces new micro-location: The Vesper's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Celestial Kitsune moves as living extension of Kael's mercy-choice. Bond manifests as synchronized breath rhythms; when Kael guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Solarpunk Amazonia traditions fuse with FGE Material Universe via the Celestial Kitsune as cultural emissary. Introduces new micro-location: The Kael's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.

The Celestial Kitsune moves as living extension of Zephyr's mercy-choice. Bond manifests as synchronized breath rhythms; when Zephyr guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Mycelial Slavic traditions fuse with FGE Material Universe via the Celestial Kitsune as cultural emissary. Introduces new micro-location: The Zephyr's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Lunar Mothling moves as living extension of Selene's mercy-choice. Bond manifests as synchronized breath rhythms; when Selene guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Crystal Spire Tibetan traditions fuse with FGE Material Universe via the Lunar Mothling as cultural emissary. Introduces new micro-location: The Selene's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Spectral Bunny moves as living extension of Vesper's mercy-choice. Bond manifests as synchronized breath rhythms; when Vesper guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Astral Korean traditions fuse with FGE Material Universe via the Spectral Bunny as cultural emissary. Introduces new micro-location: The Vesper's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.

The Spectral Bunny moves as living extension of Caelum's mercy-choice. Bond manifests as synchronized breath rhythms; when Caelum guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Obsidian Andean traditions fuse with FGE Material Universe via the Spectral Bunny as cultural emissary. Introduces new micro-location: The Caelum's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Dreamscale Wyrmling moves as living extension of Ves's mercy-choice. Bond manifests as synchronized breath rhythms; when Ves guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Mycelial Slavic traditions fuse with FGE Material Universe via the Dreamscale Wyrmling as cultural emissary. Introduces new micro-location: The Ves's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Whispering Owl moves as living extension of Zep's mercy-choice. Bond manifests as synchronized breath rhythms; when Zep guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Starlit Persian traditions fuse with FGE Material Universe via the Whispering Owl as cultural emissary. Introduces new micro-location: The Zep's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.

The Nebula Puffball moves as living extension of Rowan's mercy-choice. Bond manifests as synchronized breath rhythms; when Rowan guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Neo-Venetian Mirror Court traditions fuse with FGE Material Universe via the Nebula Puffball as cultural emissary. Introduces new micro-location: The Rowan's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Celestial Kitsune moves as living extension of Mir's mercy-choice. Bond manifests as synchronized breath rhythms; when Mir guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Solarpunk Amazonia traditions fuse with FGE Material Universe via the Celestial Kitsune as cultural emissary. Introduces new micro-location: The Mir's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Ember Sprite moves as living extension of Zep's mercy-choice. Bond manifests as synchronized breath rhythms; when Zep guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Starlit Persian traditions fuse with FGE Material Universe via the Ember Sprite as cultural emissary. Introduces new micro-location: The Zep's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.

The Void Dragonet moves as living extension of Mira's mercy-choice. Bond manifests as synchronized breath rhythms; when Mira guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Shadowstep Inuit traditions fuse with FGE Material Universe via the Void Dragonet as cultural emissary. Introduces new micro-location: The Mira's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Crystal Gecko moves as living extension of Iso's mercy-choice. Bond manifests as synchronized breath rhythms; when Iso guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Shadowstep Inuit traditions fuse with FGE Material Universe via the Crystal Gecko as cultural emissary. Introduces new micro-location: The Iso's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Crystal Gecko moves as living extension of Silas's mercy-choice. Bond manifests as synchronized breath rhythms; when Silas guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Eldritch Victorian Court traditions fuse with FGE Material Universe via the Crystal Gecko as cultural emissary. Introduces new micro-location: The Silas's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.

The Glimmerwing Dragonfly moves as living extension of Indra's mercy-choice. Bond manifests as synchronized breath rhythms; when Indra guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Solarpunk Amazonia traditions fuse with FGE Material Universe via the Glimmerwing Dragonfly as cultural emissary. Introduces new micro-location: The Indra's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Plasma Corgi moves as living extension of Orion's mercy-choice. Bond manifests as synchronized breath rhythms; when Orion guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Cyber-Gaelic traditions fuse with FGE Material Universe via the Plasma Corgi as cultural emissary. Introduces new micro-location: The Orion's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Void Dragonet moves as living extension of Emb's mercy-choice. Bond manifests as synchronized breath rhythms; when Emb guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Dreamweave Australian Aboriginal traditions fuse with FGE Material Universe via the Void Dragonet as cultural emissary. Introduces new micro-location: The Emb's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.

The Ember Sprite moves as living extension of Lyra's mercy-choice. Bond manifests as synchronized breath rhythms; when Lyra guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Quantum Maori traditions fuse with FGE Material Universe via the Ember Sprite as cultural emissary. Introduces new micro-location: The Lyra's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Ember Sprite moves as living extension of Ren's mercy-choice. Bond manifests as synchronized breath rhythms; when Ren guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Frostpunk Sami traditions fuse with FGE Material Universe via the Ember Sprite as cultural emissary. Introduces new micro-location: The Ren's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.
The Moonlit Racoon moves as living extension of Nova's mercy-choice. Bond manifests as synchronized breath rhythms; when Nova guards the quiet between heartbeats, the companion's presence stabilizes the 32cm gospel curvature against drift. Signature: shared luminescent traces that linger on shared surfaces.	Crystal Spire Tibetan traditions fuse with FGE Material Universe via the Moonlit Racoon as cultural emissary. Introduces new micro-location: The Nova's Quiet (pocket dimension between heartbeats accessible only through mercy pact). Event hook: Annual Starfall Apology ritual where cultures converge under one gospel curvature.

L5_Personal_Myth_Arc	L6_Canon_Ties
Wound: Versions of self that died for the secret. Transformation: From fracture-choice to what grew in it. Arc: Guard secret that rewrites stars → Choose mercy in the quiet → Become the living gospel anchor others orbit. Signature Quote Evolution: I stopped counting the versions of myself that died for this. → New verse earned through companion bond and canon event.	Bridge to Voss Clan via shared "quiet between heartbeats" doctrine and mercy-over-power gospel. Potential event tie: Velvet Womb hatching protocols or Ashgarden Protocol convergence. Relationship vector: Mentorship under Isolde Ironroot or collaborative with Rune Voss on fracture-growth narratives. Location affinity: Shadowstep Inuit territories fusing with Clockwork Ottoman courts in FGE veiled grid.
Wound: Versions of self that died for the secret. Transformation: From fracture-choice to what grew in it. Arc: Guard secret that rewrites stars → Choose mercy in the quiet → Become the living gospel anchor others orbit. Signature Quote Evolution: I stopped counting the versions of myself that died for this. → New verse earned through companion bond and canon event.	Bridge to Voss Clan via shared "quiet between heartbeats" doctrine and mercy-over-power gospel. Potential event tie: Velvet Womb hatching protocols or Ashgarden Protocol convergence. Relationship vector: Mentorship under Isolde Ironroot or collaborative with Rune Voss on fracture-growth narratives. Location affinity: Shadowstep Inuit territories fusing with Clockwork Ottoman courts in FGE veiled grid.
Wound: Versions of self that died for the secret. Transformation: From fracture-choice to what grew in it. Arc: Guard secret that rewrites stars → Choose mercy in the quiet → Become the living gospel anchor others orbit. Signature Quote Evolution: Mercy is just another kind of power. → New verse earned through companion bond and canon event.	Bridge to Voss Clan via shared "quiet between heartbeats" doctrine and mercy-over-power gospel. Potential event tie: Velvet Womb hatching protocols or Ashgarden Protocol convergence. Relationship vector: Mentorship under Isolde Ironroot or collaborative with Rune Voss on fracture-growth narratives. Location affinity: Shadowstep Inuit territories fusing with Clockwork Ottoman courts in FGE veiled grid.

Wound: Versions of self that died for the secret. Transformation: From fracture-choice to what grew in it. Arc: Guard secret that rewrites stars → Choose mercy in the quiet → Become the living gospel anchor others orbit. Signature Quote Evolution: I didn't choose the fracture. I chose what grew in it. → New verse earned through companion bond and canon event.	Bridge to Voss Clan via shared "quiet between heartbeats" doctrine and mercy-over-power gospel. Potential event tie: Velvet Womb hatching protocols or Ashgarden Protocol convergence. Relationship vector: Mentorship under Isolde Ironroot or collaborative with Rune Voss on fracture-growth narratives. Location affinity: Shadowstep Inuit territories fusing with Clockwork Ottoman courts in FGE veiled grid.
Wound: Versions of self that died for the secret. Transformation: From fracture-choice to what grew in it. Arc: Guard secret that rewrites stars → Choose mercy in the quiet → Become the living gospel anchor others orbit. Signature Quote Evolution: Some truths are too heavy for gravity to hold. → New verse earned through companion bond and canon event.	Bridge to Voss Clan via shared "quiet between heartbeats" doctrine and mercy-over-power gospel. Potential event tie: Velvet Womb hatching protocols or Ashgarden Protocol convergence. Relationship vector: Mentorship under Isolde Ironroot or collaborative with Rune Voss on fracture-growth narratives. Location affinity: Shadowstep Inuit territories fusing with Clockwork Ottoman courts in FGE veiled grid.
Wound: Versions of self that died for the secret. Transformation: From fracture-choice to what grew in it. Arc: Guard secret that rewrites stars → Choose mercy in the quiet → Become the living gospel anchor others orbit. Signature Quote Evolution: The quiet between heartbeats is where the real war happens. → New verse earned through companion bond and canon event.	Bridge to Voss Clan via shared "quiet between heartbeats" doctrine and mercy-over-power gospel. Potential event tie: Velvet Womb hatching protocols or Ashgarden Protocol convergence. Relationship vector: Mentorship under Isolde Ironroot or collaborative with Rune Voss on fracture-growth narratives. Location affinity: Shadowstep Inuit territories fusing with Clockwork Ottoman courts in FGE veiled grid.

Wound: Versions of self that died for the secret. Transformation: From fracture-choice to what grew in it. Arc: Guard secret that rewrites stars → Choose mercy in the quiet → Become the living gospel anchor others orbit. Signature Quote Evolution: Mercy is just another kind of power. → New verse earned through companion bond and canon event.	Bridge to Voss Clan via shared "quiet between heartbeats" doctrine and mercy-over-power gospel. Potential event tie: Velvet Womb hatching protocols or Ashgarden Protocol convergence. Relationship vector: Mentorship under Isolde Ironroot or collaborative with Rune Voss on fracture-growth narratives. Location affinity: Shadowstep Inuit territories fusing with Clockwork Ottoman courts in FGE veiled grid.
Wound: Versions of self that died for the secret. Transformation: From fracture-choice to what grew in it. Arc: Guard secret that rewrites stars → Choose mercy in the quiet → Become the living gospel anchor others orbit. Signature Quote Evolution: Even stars apologize when they fall. → New verse earned through companion bond and canon event.	Bridge to Voss Clan via shared "quiet between heartbeats" doctrine and mercy-over-power gospel. Potential event tie: Velvet Womb hatching protocols or Ashgarden Protocol convergence. Base Render Seed: Dante Celest, Dreamweave Australian Aboriginal heritage, Astral Sloth companion at heel or shoulder. 32cm gospel spine curvature locked in mercy-moment pose. Immutable: Heterochromia — one eye the color of deep space, the other reflects the last thing they truly loved ... Feral Gloss Signature: wet specular highlights on opalescent skin, single-source moonlight tenebrism, predatory yet merciful gaze, subtle heat distortion on edges, Kintsugi gold fill on scar/birthmark accents. Pose Foundation: 6-pose set — quiet vigil, fracture embrace, companion sync, north-star lock, mercy blade, starfall apology. Lighting: Phase 3 Afterglow flush + deep space heterochromia catchlights. Style: Olivia de Berardinis pinup precision meets Mario Testino editorial darkness. No drift from gospel anchor.	I stopped counting the versions of myself that died for this.
Base Render Seed: Elara Ebonheart, Clockwork Ottoman heritage, Dreamscale Wyrmling companion at heel or shoulder. 32cm gospel spine curvature locked in mercy-moment pose. Immutable: Always wears a single earring that changes shape based on their current emotional state Fingertips... Style: Olivia de Berardinis pinup precision meets Mario Testino editorial darkness. No drift from gospel anchor.	I stopped counting the versions of myself that died for this.
Base Render Seed: Isolde Ironroot, Shadowstep Inuit heritage, Crystal Gecko companion at heel or shoulder. 32cm gospel spine curvature locked in mercy-moment pose. Immutable: A thin scar across the left palm that glows faintly when they speak an untruth Voice carries a sub... Feral Gloss Signature: wet specular highlights on opalescent skin, single-source moonlight tenebrism, predatory yet merciful gaze, subtle heat distortion on edges, Kintsugi gold fill on scar/birthmark accents. Pose Foundation: 6-pose set — quiet vigil, fracture embrace, companion sync, north-star lock, mercy blade, starfall apology. Lighting: Phase 3 Afterglow flush + deep space heterochromia catchlights. Style: Olivia de Berardinis pinup precision meets Mario Testino editorial darkness. No drift from gospel anchor.	I didn't choose the fracture. I chose what grew in it.
Base Render Seed: Silas Moonveil, Eldritch Victorian Court heritage, Crystal Gecko companion at heel or shoulder. 32cm gospel spine curvature locked in mercy-moment pose. Immutable: Perpetual faint smile that never reaches the eyes — a defense mechanism from childhood Always wear... Feral Gloss Signature: wet specular highlights on opalescent skin, single-source moonlight tenebrism, predatory yet merciful gaze, subtle heat distortion on edges, Kintsugi gold fill on scar/birthmark accents. Pose Foundation: 6-pose set — quiet vigil, fracture embrace, companion sync, north-star lock, mercy blade, starfall apology. Lighting: Phase 3 Afterglow flush + deep space heterochromia catchlights. Style: Olivia de Berardinis pinup precision meets Mario Testino editorial darkness. No drift from gospel anchor.	Mercy is just another kind of power.

Base Render Seed: Indra Emberfall, Solarpunk Amazonia heritage, Glimmerwing Dragonfly companion at heel or shoulder. 32cm gospel spine curvature locked in mercy-moment pose. GATE FLOW

Step	
1	
2	
3	
4	

Rule

Absolute immunity. No Artifact, any domain, any stack. Violation = automatic rejection.

Protected within named domains only.

Transformable; output auto-flagged for canon review.

Free transformation within Assembly limits.

Absorbs

—

—

Fashion, Architecture, Scale

Atmosphere

Symbolism

Meaning

Commands the image. Max one per Assembly.

Visible transformation, coexists.

Detail-level seasoning.

Meaning

Known, stored, unminted. Template output. No canon rights.

Fully governed by Director decree: manifest + registry + provenance + gravity + status.

Minted and generating / minted, valid, resting. Decree moves both ways.

Attention allocation, not quality. Experimental is template default.

Reason

Locked canon character (OMEGA relic holder)

Bloodline surname — Director-assigned only

Pending dossier — frozen

Origin asset

Origin assets

Expansion Line candidates — name collisions unresolved

Unbound Recurring Entity

Status

Isolde Voss identity marker — quarantined

Isolde Voss identity marker — quarantined

Isolde Voss Ω relic — quarantined

Permitted generally; flagged for review (banned in all Isolde corrections)

Action
Line fills intake row → Gate_Status: Pending Review
Validation line reviews → Cleared or Returned (Compliance_Flags)
Director decree mints → Mint_Decree_Ref + Vault_ID assigned
Only then: manifest finalized, production eligible

DISPOSITION SUMMARY

Total assets audited: 43

Files at/above Primary floor (1800px): 0

PNG-labeled files that are actually JPEG: 31

REGEN-P (regenerate at 2x via canon line): 22

REBUILD-DOC (rebuild as composed layout): 20

DEDUPE (drop duplicate): 1

RULING: This set is a visual reference inventory, not compression input.

Format-truth normalization complete: all 43 re-encoded as honest .jpg, metadata stripped, q92.

Normalized files are ship-ready ONLY for Secondary/Tertiary placement. No file qualifies Primary as-is.

Real-ESRGAN ruled out for Primary: upscaling lossy JPEG launders artifacts into a false master.

Text-heavy doctrine pieces (REBUILD-DOC) must NOT be AI-regenerated — rebuild as layouts to avoid garbled text.

◆ OPENING DOCTRINE ◆

The Four Foundations of the FGE Material Universe

1. THE PEARL DOCTRINE

YOU ARE LAYERING,
NOT FAILING.

Every output is a layer. Every layer adds clarity.
Every cycle reveals more of your creative fingerprint.

© Imperfection is not the enemy. Opacity is. Stay in the light.

2. THE OBSIDIAN WARNING

HERE IS WHERE
THE SYSTEM FRACTURES.

- ✗ Ignore the ratio.
- ✗ Overload the system.
- ✗ Skip the anchors.
- ✗ Refuse to log.
- ✗ Chase output over coherence.

⚠ Fracture creates drift. Drift becomes distortion.
Distortion breaks canon.

3. THE KINTSUGI PROMISE

FRACTURE BECOMES
GOLD SEAM.

Breakage is not the end. It is the strengthening.
Every repaired fracture becomes part of your legendary story.

◆ You do not erase the crack. You honor it. You seal it. You evolve through it.

4. THE DRAGON RATIO

1:3
CALIBRATION
HONEST
(EMBERLING)

1:7
MASTERY
DEEP
(ASCENDED)

1 win for every 3 actions = Calibration
1 win for every 7 actions = Mastery

*This is not failure.
This is ignition.*

▲ You start at Emberling. The Calibration Flame.
Generation 0. Zero drift. All 32 points at neutral.

YOUR FIRST STATE: EMBERLING 🔥

🔥 Generation 0
No history yet. All cycles are calibration.

© 32 Points at Neutral
Zero drift. Perfect balance.

📖 No Lineage Yet
You will build it. We will honor it.

✦ You Are the Author
The dragons govern. You direct.

“You start at Emberling. Everything after is calibration.”
